Biostat-MID-2011

Dr. Mohd Nassar questions

1.	a drawn chart : of what type it is?
	bar cluster chart

- 2. the most usefull measure of that of the central tendancy that is affected by extremes:
 - 1- mean
 - 2- median
 - 3- mode
 - 4- range
- 3. gender is considered as variable on what level of measurement:

nominal

ordinal

ratio

interval

4. body weight in pounds is:

nominal

ordinal

interval

ratio

5. a research studying the effect of 4 drugs on \dots

the best chart to be used to present the data is

- 1- line chart
- 2- bar chart
- 3- box chart
- 4- pie chart

- 6. the best measure to be used to the occurance of is
 - 1- frequency
 - 2- mean
 - 3- standered deviation
- 7. in a study, the mean was 46, median 50, mode = 53 the distribution is:
 - 1- normal
 - 2- shifted to the left (negatively skewed)
 - 3-shifted to the right (positively skewed)
- 8. percentile 50 describes : median
- 9. p, df, and X^2 are stated in the right order as:

$$x^2 =, df =, p =$$

- 10. BMI>> Ordinal level of measurement
- 11. in a chi square table, what is the p value?
 - a. 0.002
 - b. 0.003
 - c. 0.004
 - d. 0.005
- 12. what decision to make when p value is less than Alpha?
 - a. reject statistical hypothesis (alternative hypothesis)
 - $b.\ accept\ statistical\ hypothesis\ (\ alternative\ hypothesis\)$
 - c. accept null hypothesis
 - d. reject null hypothesis

13. what is the suitable test for this study (men & women with smoke status) ? a. chi square b. MW c. t test
14. for normal distribution , what is the type of chart ?a. bar chartb. histogramc. pie chart
 15. (JU & JUST scores ,sample = 20, experimental & control groups), what is the test? a. ANOVA b. t- test c. paired t- test d. chi square
16. p50 =53 ,what is the median? a. 55 b. 53
17. hallmark of good chart?a. simple & easy to readb. understood just by the researcher.c. use color as decoration.d. a poor chart
18. nominal level of measurement: a. mean b. median c. mode d. all of the above

- 19. what is the type of body weight in (A1C { diabetes } and post -traumatic stress symptoms) study:
 - a. dependent
 - b. Extranous
 - c. independent
 - d. Outlier

Dr. Madi alja3'beer questions:

- 20. have high EBD:
 - 1 diarrhea
 - 2- upper respiratory tract infections
 - 3- intentional injuries
 - 4- most cases are of ... (it might be measels)
 - 5- all of the above
- 21. the humeral theory was introduced by : hippocrates
- 22. carcinogenic material:
 - 1- coal
 - 2- silica
 - 3- pollen
 - 4- animal dander
 - 5- all of the above
- 23. DALY expresses:
 - 1-diseased adjusted life years
 - 2- deadlyyears
 - 3- deadly aquired ...
 - 4- disability aquiered...
 - 5- non of the above

Lejan 2009/2010

24. a question about the personal environment >> it might affect the person more than surrounding environment..
