Fatima Jamal Al-Debsi

Ciprofloxacin : Dna gyrase

E.coli does not produce : Oxidase

Which of the following is not characteristic for E.coli : Catalase positive

Urease negative***

All dna viruses replicate in nucleus except : Pox virus

Which of the following does not use PCR: Amino acid

Ganciclovir better than acyclovir for treatment : CMV

Autoinfection : Pinworm

Reassortment: Flu +rotavirus

عرض الترجمة

Ciprofloxacin : Dna gyrase

E.coli does not produce : Oxidase

E.coli : Catalase positive

Urease positive***

All dna viruses replicate in nucleus except : Pox virus

Which of the following does not use PCR: Amino acid

Ganciclovir better than cidociclovir for treatment : CMV

Autoinfection : Pinworm

Reassortment: Flu +rotavirus

:

Which of the following not in pcr reaction :

- DNA polymerase
- amino acids *
- nucleotides
- Dna template
- Dna primer

Reassortment include :

- influenza a
- rotavirus
- herpes simplex
- a & b *

All of the above

Which of the following is the next step after attachment and penetration:

- uncoating *
- Replication
- Protein synthesis

Which of the following dna viruses do not replicate in nucleus:

- parvo
- pox *
- hepatitis
- adeno

Which of the following not a characteristic feature of shigella :

- oxidase negative
- resistant to bile salts
- motile *
- non lactose fermenter

Which of the following don't have preventable vaccine :

- tuberculosis
- syphilis *
- heamophilus

Which of the following not plasmodium species :

- p.vivax
- p.ovale
- p.malariae
- p.plasomdia *
- p.falciparum

According to leishmania :

- transmitted by sandflies (phlebotomous) *
- cutaneous leishmania caused by I.donovani
- kala azar caused by I.tropica
- all of the above
- non of the above

Trichomonas vaginalis :

- yellow or creamy discharge
- in males , infect prostate , seminal vesicles and urthera
- moves with wobbling and rotating motion
- inflammation limited to cervix and vagina
- all of the above *

Which of the following is similar to shigella :

- enteroinvasive e.coli *
- enterohemorrhagic e.coli
- enteropathogenic e.coli
- enterotoxigenic e.coli

Neisseria meningitidis ferment :

- glucose
- maltose
- lactose
- all of the above
- a & b *

Which of the following cause elephantiasis :

- wuchereria bancrofti *
- strongyloides stercoralis

Which of the following is auto infection :

- enterobius vermicularis*
- ascaris lumbricoides

KOH preparation :

- used for diagnosis of fungi
- detection of presence of fungi
- something 20 minutes p:
- all of the above * [I guess]
- non of the above

Cryptosporidium parvum :

- cause acute diarrhea in immunocompromised patients *
- the common cause of diarrhea in normal people
- oocyte red by gram stain
- detection through oocyte staining by gram stain
- all of the above

Ganacyclovir has more efficacy than acyclovir in :

- cytomegalovirus *
- herpes simplex virus

Thin blood film :

- used in differentiation between malaria species*
- detection of mild infection
- Rapid diagnostic test
- all of tha above
- non of the above

Which of the following infect man by malaria :

- sporozoites *
- merozoites
