

mifepriston >> anti progestin

Faraj ugs

_ wrong about causes that help in filtration : afferent diameter less than efferent ... Physio(yanal)

_Q about the net filtration pressure equation .. Physio (yanal)

_wrong :glucose no clearance for it .. Physio (yanal)

_wts wrong about glucose ,a.a, bicarbonate >> reabsorb in 2nd half of proximal tubule .

passive or active process that need a protein carrier. كثير جاب عن قصة.

_ Q >> isosmotic between capsule and filtration .

loop of henle كثير جاب اسئلة باست بيبر و بامتحانا جاب عن

* descending >> pass water >> passive >> hypertonic

* ascending : no water ,, hypotonic

Thin >> passive >> NaCl

Thick >> active>> Na-K -2Cl

لاب _ Q j_g>> renin >>

_early DCT >> cortical diluting segment سؤال عنه بس ناسي شو كان بالزبط.

_ lab Q about principle cell + intercalated cell >> احفظو الفكتشن و الستركشر تاعونهم لانه الخيارات كانت عنهم بس ناسية بالزبط ايش كان.

_ Q about concentrate of urine >> ادرسوا

_ Q about urea >> collecting duct absorption

_Q about ADH>> اي منطقة لازم يكون موجود او ما يكون ضروري موجود احفظوه.

>> lab Q_ جاب الصورة اللي بصفحة ٤ في هنداوت ٢ >> " ant relation kidney " >> عن اي جزي متصل بالكلية مباشرة "no periteniolum"

>> Q about post relation of kidney احفظوهم

>> Q about course of ureter _ناسي شو كان فادرسوا و ضروري تعرفوا :

* ureter cross common iliac artery .

*uterine artery above urete" water under bridge (uterine artery)"

_Q about referred pain of ureter >> from box in the page 10 handout 2

_Q about diameter of inlet and outlet >> which is the widest A-P or transverse

_ Q about median lobe of prostate enlargement >> causes urinary retention

بس لهون وصلت و ان شاء الله بكرة بكفي ..موقعي

Q about covering spermatic cord wrong : external spermatic fascia covers the cord in its whole extent .

_ Q about wts not pierce the perineal membrane .. Adroso nasiah sho kan jwab .

_ Folly catheter can be introduced to a patient with hypospadias.

_ 2nd + 23 double DNA >> sec spermatocyte

_ all from mesonephric duct except >appendix of testis

_ failure fusion of caudal part of mullerian duct >> uterine congenital

_ true >> suckling induce milk ejection and uterus contraction

_ female true pelvis is shorter than males and its inlet and outlet are wider .

_ all have dual origin except >> cervix

_ post surface of prostate can be palpated by rectal examination

_ wrong >> true capsule have a venous plexus

_ wrong >> middle piece of sperm contain only the axoneme surrounded by cell membrane

_ Q lab pic histo zay p. 8B hand out 3 wrong : all these cell normal cell
 _ Q lab histo cell rare to see or we dont see: sec spermatocyte
 dihydrotestosterone , penis, scrotum , Wrong action of testosterone >>
 prostate
 _باللاب كان الدكتور يجيب صور هيستو عن الميل ريبيردكتف و كان يركز على
 number of muscle layer , type of epithilum , function
 هيك الخيارات كانت احنا جابلنا عن
 Wrong in epididymis pic >> كان الجواب ايشي بالفنكشن تااعها غلط
 _contents of broad ligment >> احفظوهم
 _structure that support uterus > transverse cervical ligaments
 _ junction between rectum and anal canal (or external sphinter) > puborectalis
 _extravesated urine spread through all of these except >> ischiorectal fossa
 _ wt should not cut in episiotomy >> levator ani
 _ او اجى بالعكس السؤال كان انه شو اللي بنقطعه ناسية بالزبط شو
 كان

insert the needle in ischiotuberosity pudendal block >> انه شفته كتير باست بيبر
 _ when we do overy ectomy we should not cut >> mesovarium
 _بتذكر في سؤال كانوا خياراته عن مراحل تطور
 >> its contain fertilized ova و كأنه الجواب الغلط كان انه 2ndry follicle to graffian follicle
 _ how to keep the corpus leutum >> pregnancy
 _ Q about follicle atresia _ ناسية شو كان بالزبط .. ادرسوها
 _ Q lab wring about the proliferative stage or secretory phase >> the answer was about there gland
 * proliferative >> increase the number and length of gland + straight
 * secretory >> increase in gland number + tortuous
 _ احفظوهم ناسية شو الجواب كان the blood of mense contain except >>
 _ Q lab pic histo of uterine tube or vagina >> no submucosa
 _ Q about structure of breast p. 44B hand out 4
 _لانه ناسية شو كان بالزبط
 _the suspensory ligments of cooper it cause the fixity of gland and pukckering of the skin >> study
 the clinical application of carcinoma p44E
 _ wrong about breast cancer metastasis>> can not reach the central or apical group of lymph
 nodes
 _ Q about breast anomalies و كأنت كان عن supra breast >> polymastia
 _ Q lab histo pic about resting breast >> rich in fats
 _ Q lab pic about active proliferating breast pregnancy >> alveoli distended but is Not produce milk
 _ Q how the lactation block the ovulation >> inhibit the GnRh+ LH+ FSH
 _ Both granulosa cell + theca interna have LH receptor .
 _ corpus leutum prevent second cycle through inhibin
 _مش متأكدة اذا اجى او من كتر ما عاد هي المعلومة اتبيالي انه اجت the follicle set the time for its own ovulation
